## What is claimed is:

- 1. A method of inducing an antiviral response in an individual comprising administering to the individual an effective amount of an agent which blocks the binding of lymphotoxin-ß to its receptor, and a pharmaceutically acceptable carrier.
- 5 2. A method of claim 1 wherein said agent is a LT-beta-R blocking agent.
  - 3. The method of claim 2 wherein said agent is an antibody against the lymphotoxin-ß receptor or a soluble lymphotoxin-ß receptor.
  - 4. The method of claim 3 wherein said agent is a lymphotoxin-β receptor/Ig fusion protein.
- The method of claim 1 wherein said agent is a soluble lymphotoxin-β or an antibody against lymphotoxin-β.
  - 6. A method of inducing an antiviral response in an individual comprising administering to the individual an effective amount of an agent which blocks the lymphotoxin-β-receptor and/or HVEM signaling pathway.
- The method of claims 1- 6 wherein said individual is infected with Sin Nombre Virus, Ebola virus, Marburg virus, Lassa virus or Dengue.
  - 8. The method of claim 7 wherein the agent is a lymphotoxin-\(\beta\)-R/Ig fusion protein.
